EXPERIENCES

Internship Applied AI Engineer, VIDAL France.

January 2026 - July 2026

- Asynchronous embedding pipeline & streaming: 220,000 chunks (1,000 tokens) processed in 38 minutes
- Multi-agent system (ReAct + MCP): analysis of FHIR records → clinical recommendations (contraindications, abnormalities, preventive measures) via web and vector searches
- MCP Tools: Fuzzy Search + Contextual Elicitation

CDD Junior R&D Developer, Weda S.A.S.

January 2023 - June 2023

- Development of an NLP tool that automates the mapping between heterogeneous databases. Proposed and led this initiative, which eliminated a time-consuming manual process for the team.
- Design of the System for Exporting Sensitive Patient Data
- Integration of an electronic document signature API (> 1,000 simultaneous submissions)

CS Internship R&D, Weda S.A.S. & Vidal.

April 2022 - July 2022

- Secure real-time distribution of medical test results using C# parallelization.
- Development of a Real-Time Database Health Monitor

CS Internship, Agile Water.

August 2019

- Assistance with the design of a remote IoT system for monitoring water quality.

PROJECTS & ACHIEVEMENTS

- Implementation and fine-tuning of CLIP for multimodal classification
- Multi-class classification of tweets. Hyperparameter optimization (Optuna), F1-score. (2025)
- Medical RDF knowledge graph based on 50,000 Wikipedia pages. (2025)
- "Marching Cubes" algorithm with GPU parallelization for performance optimization (2023)

TRAINING COURSES

Master's in Artificial Intelligence and Data Science at the University of Montpellier.

2023-2026

- Dual Degree: Master's in Management from IAE, University of Montpellier
- *Machine Learning, NLP, Parallel Programming, Database Administration*

Pool - École 42, Paris

August 2023

Top student. Advanced C and Shell: data structures (built from scratch), memory management (pointers).

Data Scientist Training Program, Vidal Paris.

June 2022

NLP Training: Text Preprocessing (tokenization, stemming, lemmatization, regex) and Entity Recognition.

Completion of two years at CESI Montpellier, a computer science engineering school.

2020-2022

Computer science tutoring (SQL, C++, algorithms, etc.), following strong academic performance.

BAC S-Scientifique, with a specialization in engineering science and the European Section

2017-2020

Auguste Loubatières High School, Agde

TECHNICAL SKILLS

ML/DL: Langchain, LangGraph, Pydantic-AI, PyTorch, Tensorflow

AI: ReAct Loop, MCP, Multi-agent, RAG

CI/CD & outils: Docker, git (advanced), Github actions, Jenkins, Langfuse, FastAPI

HOBBIES

Technology: Competitive programming, Web design (Figma), 3D design (Blender), FPV drone piloting

Hobbies & Travel: Photography, Film, Literature, Chess; Europe, North Africa, Asia

Sports: Swimming (20 years of practice) & Basketball
